Dear Hiring Manager,

I am excited to apply for the Angular Front-End Developer position at your organization. With over three years of experience building responsive and scalable web applications using Angular (v11+), TypeScript, and SCSS, I am confident in my ability to make a valuable contribution to your development team.

At Femtosoft Technologies, I have played a key role in designing and building dynamic user interfaces for various logistics and courier-based applications. My work on projects like Balaji Courier and Bluewings Cargo involved full-cycle development right from component design to API integration and dynamic PDF generation using PHP. I have a strong track record of writing clean, maintainable code and ensuring cross-browser compatibility and responsiveness.

What sets me apart is my keen attention to detail, collaborative spirit, and commitment to delivering high-quality user experiences. I am comfortable working in Agile environments and enjoy tackling front-end challenges that push me to grow.

I am excited about the opportunity to contribute to your team and would welcome the chance to discuss how my background aligns with your goals. Thank you for considering my application. I look forward to the possibility of speaking with you further.

Warm regards,
Brundha K

[This resume outlines the professional experience, technical skills, and project achievements of an Angular Front-End Developer with over 3 years of experience. It highlights expertise in Angular, TypeScript, responsive design, and API integration for scalable web applications.]

Brundha Software Developer

Professional Summary:

Front-End Developer with 3+ years of experience in building responsive and dynamic web applications using Angular (v11+), TypeScript, HTML, SCSS, and Bootstrap. Proven ability in crafting seamless UI experiences, integrating with backend APIs, and optimizing performance.

Core Competencies

- **Frameworks & Languages:** Angular 11+, TypeScript, JavaScript, HTML5, SCSS, Bootstrap
 - **Integration :** RESTful APIs, PHP (for dynamic PDF generation)
 - **Development Tools:** Visual Studio Code, Git, Chrome DevTools
 - **Key Skills:** Component-Based Architecture, Responsive Design, CRUD Operations, Agile Methodologies, PDF Automation, Cross-Team Collaboration
-

Professional Experience

Software Engineer

Femtosoftware Technologies, Chennai

March 2022 – February 2025

- Developed scalable Angular applications using component-based architecture.
- Built fully responsive layouts with SCSS and Bootstrap, ensuring cross-browser compatibility.
- Integrated REST APIs to streamline data flow between front-end and backend systems.
- Automated document reporting through PHP and FPDF library.
- Collaborated closely with UI/UX and QA teams for end-to-end feature delivery

Key Projects:

- **Balaji Courier – Booking & Delivery Platform**
 - Designed and developed booking module UI.
 - Implemented full CRUD functionality and backend API integration.
- **ST Courier (CARGO)**
 - Conducted functional testing and supported Angular component development.
- **Vega Express – Clearance Software**
 - Created UI for compliance checks and automated document workflows.
- **Bluewings Cargo & Skydart Express**
 - Built shipment tracking dashboard and Excel upload feature.
 - Implemented optimized route display logic and post-booking PDF generation.

Brundha Software Developer
